Abstract

Maine Maritime Museum Library, *collector*.

Marine catalog collection.

13 boxes (6 shelf feet).

Catalogs for marine engines, machinery, and equipment; for tools; and for boats and canoes, received at various times by the Museum and stored together for ease of access. Catalog contents may relate to construction and equipping of merchant vessels, naval vessels, fishing vessels, or yachts. Divided into two series: I, Non-Maine catalogs, and II, Maine catalogs. Each series is arranged by the manufacturer's name. The collections is added to from time to time as new catalogs are received.

List of company names available in repository; addition material available for some of the companies.

Added entries: Catalogs; Marine engines; Ships-- Equipment and supplies; Tools; Machine-tools; Machinery; Yachts and yachting; Boats and boating; Yacht racing.

Restrictions

There are no restrictions on the use of this material.

Foreword

The processing of this collection and the preparation of the inventory were made possible by a grant from the Davis Family Foundation, Falmouth, ME.

Scope and Content

The catalogs in this collection were received by the Museum from many sources over the years. Some are accessioned and many are not. As new single catalogs are received, they are added to the collection and the container list is amended accordingly.

The catalogs are usually original and date from the 1830's to the present. A few are reprints, and a few are for foreign companies. Occasionally a catalog will contain a letter or two, either from the manufacturer to an agent or from an agent to a customer; these have been left in the catalogs.

The catalogs are divided into two series, non-Maine and Maine. Within each series the catalogs are arranged simply in alphabetical order by the name of the manufacturer rather than by the name of the agent or representative. In many cases the processor has added a descriptive phrase noting the type of product or some special feature which is not apparent from the catalog's title. No attempt has been made to try to date the catalogs or to explain their contents in any other way.
